A workshop scene featuring a glowing incandescent light bulb hanging from a wooden shelf. Below the bulb, a person's arm is visible, interacting with a wooden control box that has three small knobs. To the right of this box is another wooden control box with two knobs and a large circular dial. The background shows a cluttered workshop with various tools and materials.

From Maker To Market

Big names:

3D Robotics – born at a weekend with the kids

Adafruit – born from the creative mind of a bored MIT student

Sparkfun Electronics – born in a university dorm room

MakerBot Industries – born in a hackerspace

OtherMill – born out of a failed startup as a side project

Born at hackathons:

GroupMe – Social messages app (sold to skype for \$10M)

Docracy – Sign legal docs online

Kickstarter favorites:

MYO armband – control stuff with hand gestures

Navdy – HUD for your car

Israeli:

Makeree (Free Time Academy)

Zuta Labs

Sensibo
